

SEDIMENTOLOGY

The Journal of the
International Association of Sedimentologists
edited by J.D. Hudson, J.D. Collinson
and M.R. Leeder

VOLUME 29
1982

BLACKWELL SCIENTIFIC PUBLICATIONS
OXFORD LONDON EDINBURGH BOSTON MELBOURNE

© 1982 *Sedimentology*

Printed and bound in Great Britain by
William Clowes (Beccles) Limited,
Beccles and London

Contents

NUMBER 1

- 1 Editorial
- 3 *Gordon C. Baird and Bertram G. Woodland.* Pennsylvanian coalified rhizomorphs in Illinois: evidence for non-compressive coalification to bituminous coal rank
- 17 *P. A. Carling.* Temporal and spatial variation in intertidal sedimentation rates
- 25 *D. Nahon and R. Trompette.* Origin of siltstones: glacial grinding versus weathering
- 37 *Peter M. Sadler.* Bed-thickness and grain size of turbidites
- 53 *O. Barndorff-Nielsen, K. Dalsgaard, C. Halgreen, H. Kuhlman, J. T. Møller and G. Schou.* Variation in particle size distribution over a small dune
- 67 *Gail M. Ashley, John B. Southard and Jon C. Boothroyd.* Deposition of climbing-ripple beds: a flume simulation
- 81 *Amos Bein and Ora Amit.* Depositional environments of the Senonian chert, phosphorite and oil shale sequence in Israel as deduced from organic matter composition
- 91 *Jesper Bartholdy.* On measuring time-averaged velocities in open channel flow
- 95 *I. N. McCave and D. N. Langhorne.* Sand waves and sediment transport around the end of a tidal sand bank
- 111 *J. D. Iversen and B. R. White.* Saltation threshold on Earth, Mars and Venus
- 121 *David M. Rubin and Ralph E. Hunter.* Bedform climbing in theory and nature
- 139 *Uwe Brand.* The oxygen and carbon isotope composition of Carboniferous fossil components: sea-water effects
- 149 Book reviews
- 153 Forthcoming papers

NUMBER 2

- 155 *Daniel H. Horowitz.* Geometry and origin of large-scale deformation structures in some ancient wind-blown sand deposits
- 181 *William A. Read and J. Michael Dean.* Quantitative relationships between numbers of fluvial cycles, bulk lithological composition and net subsidence in a Scottish Namurian basin
- 201 *E. G. Rhodes.* Depositional model for a chenier plain, Gulf of Carpentaria, Australia
- 223 *R. V. Burne and J. B. Colwell.* Temperate carbonate sediments of Northern Spencer Gulf, South Australia: a high salinity 'foramol' province
- 239 *C. Robertson Handford.* Sedimentology and evaporite genesis in a Holocene continental-sabkha playa basin—Bristol Dry Lake, California
- 255 *A. M. Winkelmolen.* Critical remarks on grain parameters, with special emphasis on shape

- 267 *J. A. Milne.* Bed-material size and the riffle-pool sequence
- 279 *Lawrence H. Larsen.* A new mechanism for seaward dispersion of midshelf sediments
- 285 *Robert J. Horodyski.* Impressions of algal mats from the Middle Proterozoic Belt Supergroup, northwestern Montana, U.S.A.
- 291 *Roger L. Borst.* Some effects of compaction and geological time on the pore parameters of argillaceous rocks

DISCUSSION

- 299 *A. C. Kendall.* A defence of the dissolution-overgrowth origin of truncation surfaces in carbonate mosaics
- 301 *I. J. Fairchild.* Reply
- 303 Book reviews
- 307 Forthcoming papers

NUMBER 3

- 309 *Frances J. Hein and Roger G. Walker.* The Cambro-Ordovician Cap Enragé Formation, Québec, Canada: conglomeratic deposits of a braided submarine channel with terraces
- 331 *Anna K. Behrensmeyer and Lisa Tauxe.* Isochronous fluvial systems in Miocene deposits of Northern Pakistan
- 353 *T. J. Barrett.* Stratigraphy and sedimentology of Jurassic bedded chert overlying ophiolites in the North Apennines, Italy
- 375 *Kathy L. Treese and Bruce H. Wilkinson.* Peat-marl deposition in a Holocene paludal-lacustrine basin—Sucker Lake, Michigan
- 391 *Peter N. Southgate.* Cambrian skeletal halite crystals and experimental analogues
- 409 *B. B. Willetts, M. A. Rice and S. E. Swaine.* Shape effects in aeolian grain transport
- 419 *M. B. Collins and J. K. Rigler.* The use of settling velocity in defining the initiation of motion of heavy mineral grains, under unidirectional flow
- 427 *Heinz Lange.* Distribution of chlorite and kaolinite in eastern Atlantic sediments off North Africa
- 433 *Tom Freeman, Juan Rosell and Antonio Obrador.* Oncolites from lacustrine sediments in the Cretaceous of north-eastern Spain

DISCUSSIONS

- 437 *P. McLaren.* Hydraulic control of grain-size distributions in a macrotidal estuary
- 438 *J. J. Lambiase.* Reply
- 441 *Mateu Esteban.* Comments on 'Petrology of recent caliche, pisolites, spherulites, and speleothem deposits from central Texas' by H. S. Chafetz and J. C. Butler
- 443 *Henry S. Chafetz and John C. Butler.* Reply
- 447 Book reviews
- 455 Forthcoming papers

NUMBER 4

- 457 *J. F. Hubert and M. G. Hyde.* Sheet-flow deposits of graded beds and mudstones on an alluvial sandflat-playa system: Upper Triassic Blomidon redbeds, St Mary's Bay, Nova Scotia
- 475 *L. Carter, R. M. Carter and G. B. Griggs.* Sedimentation in the Conway Trough, a deep near-shore marine basin at the junction of the Alpine transform and Hikurangi subduction plate boundary, New Zealand
- 499 *J. S. Bridge and J. Jarvis.* The dynamics of a river bend: a study in flow and sedimentary processes
- 543 *Brian R. Pratt and Noel P. James.* Cryptalgal-metazoan bioherms of early Ordovician age in the St George Group, western Newfoundland
- 571 *D. N. Langhorne.* A study of the dynamics of a marine sandwave
- 595 *Phillippe Roselle.* Quantitative mineralogical analysis of carbonate sediments by X-ray diffraction: a new, automatic method for sediments with low carbonate content
- 601 Book reviews
- 607 Forthcoming papers

NUMBER 5

- 609 *John K. Warren.* The hydrological setting, occurrence and significance of gypsum in late Quaternary salt lakes in South Australia
- 639 *J. D. Hudson.* Pyrite in ammonite-bearing shales from the Jurassic of England and Germany
- 669 *Ron Goldbery.* Palaeosols of the Lower Jurassic Mishhor and Ardon Formations ('Laterite Derivative Facies'), Makhtesh Ramon, Israel
- 691 *W. M. Last.* Holocene carbonate sedimentation in Lake Manitoba, Canada
- 705 *Philip Allen and Maria Mange-Rajetzky.* Sediment dispersal and palaeohydraulics of Oligocene rivers in the eastern Ebro Basin
- 717 *G. W. Farquharson.* Lacustrine deltas in a Mesozoic alluvial sequence from Camp Hill, Antarctica
- 727 *Ying Wang, David J. W. Piper and Gustavs Vilks.* Surface textures of turbidite sand grains, Laurentian Fan and Sohm Abyssal Plain
- 737 *Abhijit Basu, Douglas P. Blanchard and Joyce C. Brannon.* Rare earth elements in the sedimentary cycle: a pilot study of the first leg

DISCUSSIONS

- 743 *Timothy R. H. Davies.* Bed shear stress over subaqueous dunes, and the transition to upper-stage plane beds
- 744 *John S. Bridge.* Reply
- 749 *R. Swart and N. Hiller.* Soft-sediment deformation of sandstone related to the Dwyka glaciation in South Africa
- 750 *C. M. Bell.* Reply
- 753 Book reviews
- 759 Forthcoming papers

NUMBER 6

- 761 *Enno Nickel*. Alluvial-fan-carbonate facies with evaporites, Eocene Guarga Formation, Southern Pyrenees, Spain
- 797 *J. A. Allan and R. K. Matthews*. Isotope signatures associated with early meteoric diagenesis
- 819 *Lesley Cherns*. Palaeokarst, tidal erosion surfaces and stromatolites in the Silurian Eke Formation of Gotland, Sweden
- 835 *Robert K. Schwartz*. Bedform and stratification characteristics of some modern small-scale washover sand bodies
- 851 *Claude Larsonneur, Philippe Bouysse and Jean-Paul Auffret*. The superficial sediments of the English Channel and its Western Approaches
- 865 *Robert J. McLaughlin and Tor H. Nilsen*. Neogene non-marine sedimentation and tectonics in small pull-apart basins of the San Andreas fault system, Sonoma County, California
- 877 *James R. Steidtmann*. Size-density sorting of sand-size spheres during deposition from bedload transport and implications concerning hydraulic equivalence
- 885 *K. R. Dyer*. The initiation of sedimentary furrows by standing interval waves
- 891 *Denis A. Hughes and John Lewin*. A small-scale flood plain
- 897 *Kenneth P. Severin, Stephen J. Culver and Christian Blanpied*. Burrows and trails produced by *Quinqueloculina impressa* Reuss, a benthic foraminifer, in fine-grained sediment

DISCUSSION

- 903 *J. H. J. Terwindt and H. N. C. Breusers*. Flume experiments on the origin of flaser bedding
- 906 *Nathan Hawley*. Reply
- 909 Book reviews
- 913 Forthcoming papers
